

I oppose the introduction of Low Power FM capabilities that could jeopardize my receiving of K-LOVE (KLOV) radio on my local translator - 91.1. This radio service is a family-friendly station that provides a positive alternative in my community. If it would be replaced by an LPFM station, our community would lose a valuable contribution to the quality of life. I often introduce friends to this station. As I travel around the country, I would like to be able to continue listening to it, as it is a trustworthy source of joy, regardless of where it's heard.
